

1. Press windows key (pictured) then press next the "R" key. Do not release the windows key.

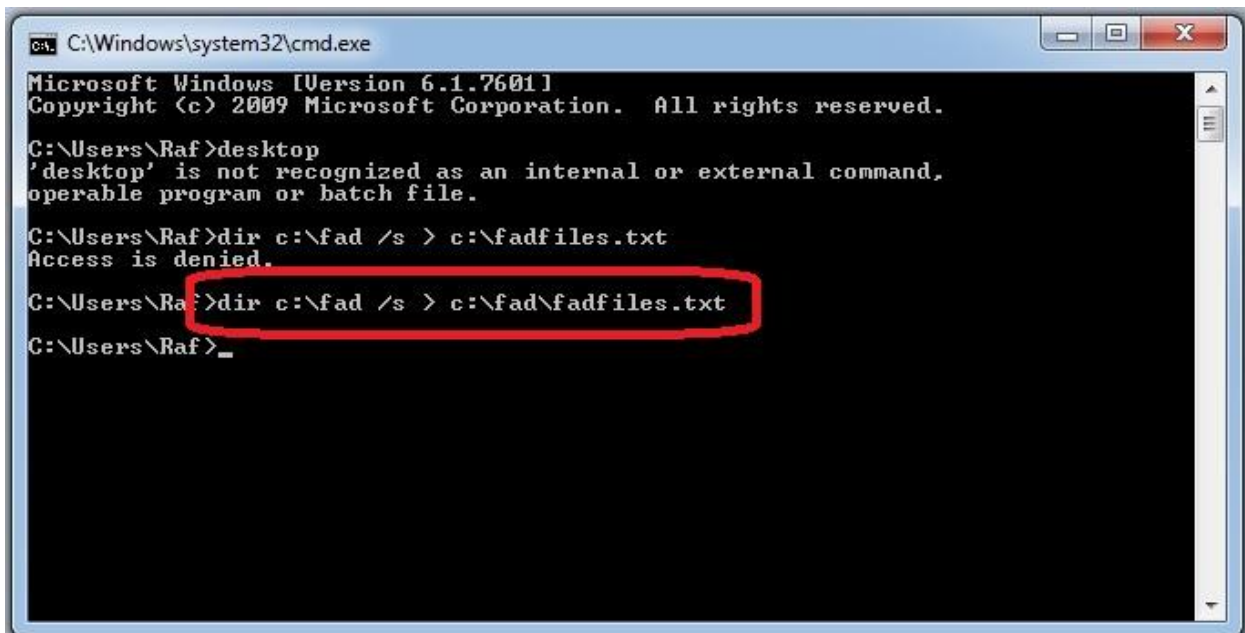

2. The Run window will open

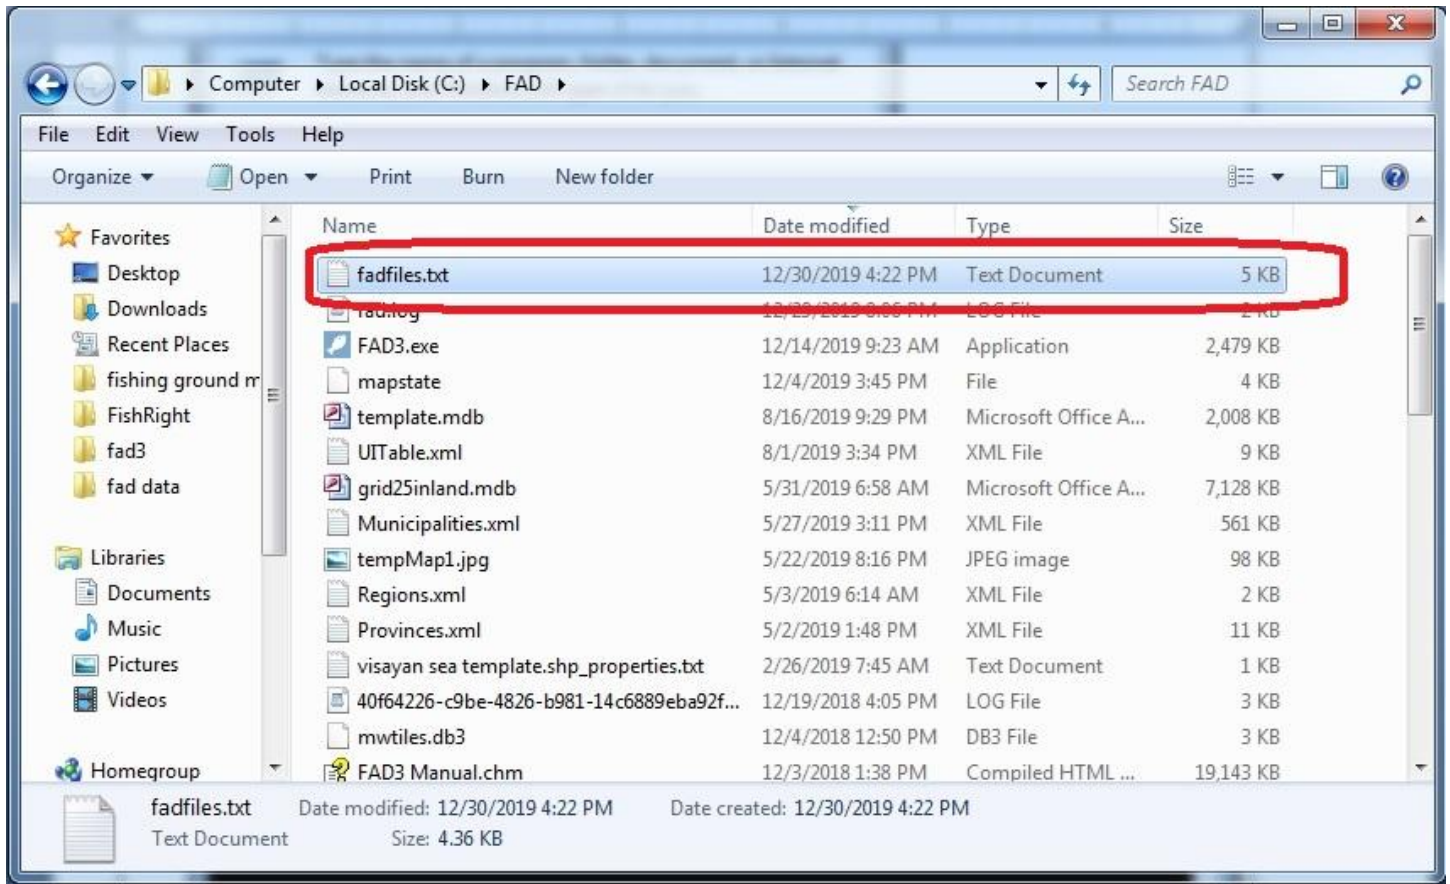

Type cmd and press the Ok button

3. A command prompt window will open. Assuming fad is installed in c:\fad, type the following command as shown below. Make sure that

```
dir c:\fad /s > c:\fad\fadfiles.txt
```

4. Open the folder where Fad is installed, for example c:\Fad. You will now see the the file you just created. If you open the this file, you will see that it is just a list of the files found in the folder.

5. Email the fadfiles.txt to me.
